Contact the Project Development Programme at pep@giz.de
To make your company’s energy supply more sustainable, it is crucial to have an experienced partner at hand for planning, financing, and implementation. The Project Development Programme under the German Energy Solutions Initiative, operated by the German Federal Ministry for Economic Affairs and Climate Action (BMWK), serves as your partner for planning customised energy solutions:

- More than ten years of project development experience in developing countries and emerging economies.
- We are not a company: we provide free, impartial and transparent advisory services on systems your company can use to obtain affordable, reliable and sustainable energy.
- A broad range of contacts including to experienced German component and system suppliers, operators of solar systems, service providers and financers. We find the ideal partner for your specific project.
- Access to high quality, innovative technology ‘Made in Germany’.

The Project Development Programme is implemented by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH.
Why work with the Project Development Programme?

• Reduce your energy costs
• Meet stricter energy requirements
• Increase corporate social responsibility

• You need a customised energy solution based on cost-effective modern technologies

• The Project Development Programme supports you at all stages of planning, implementing, and funding your new energy solutions
## How the Project Development Programme supports you

<table>
<thead>
<tr>
<th>Assessing the situation and providing advice</th>
<th>Preparing documentation and proposing partners</th>
<th>During the project</th>
<th>Further support</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Examining your requirements and local circumstances</td>
<td>• Recommending reliable, highly qualified German companies that meet your needs</td>
<td>• Providing advice and support where you have questions or issues</td>
<td>• Option of participating in training sessions, field visits to projects and fact-finding missions</td>
</tr>
<tr>
<td>• Drafting the technical system layout of your customised energy solution (e.g. technology choices, size of the plant)</td>
<td>• Preparing the tendering documents and providing advice on evaluating different offers</td>
<td>• Supporting your company with marketing measures</td>
<td></td>
</tr>
<tr>
<td>• Assessing the cost savings of the project</td>
<td>• Advising on funding and potential financing partners</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Providing information and sample contracts for legal and regulatory issues</td>
<td></td>
<td></td>
